

*Real Projects.* **REAL WORLD.** *Real Learning.*

New Tech Network

# New Tech

The New Tech program is designed to help students find answers to one of their biggest questions; How will what I'm learning now help me in the future? New Tech's project-based learning approach is all about using real-world projects to inspire self-exploration, aspire deeper levels of understanding, and to develop a desire for life-long learning.

Previous PBHS New Tech students have seen a substantial increase in test scores and attendance. Learn more about how New Tech can change the way you learn!

**Innovative  
Grading**

*I love the hands on learning.*

*-Mykal H., New Tech Student*

**Real World  
Application**

*I like not having the traditional style of homework.*

*-Cole K., New Tech Student*

**Integrated  
Technology**

*When in the proper environment, solving problems is easier.*

*-Sam A., New Tech Student*

**Collaborative  
Environment**

*New Tech classes offer students a more hands on approach to learning. Students are exposed to fewer lectures and get to experience smaller groups .*

*-Mrs. Halfin, New Tech Teacher*
